SECTION VII

TECHNICAL SPECIFICATIONS FOR 2 SEATER & 4 SEATER FRP PEDAL BOATS

1. 2 Seater / 4 Seater Pedal Boat

1. The 2 seater boat dimensions should be 2.5m x 1.6m x 0.45m. The boat must have a free board of 0.30 m.
The 4 seater boat dimension should be 3.00m x 1.80m x 0.45m. The boat must have free board of 0.30m.
2. Bucket seats must be provided for the riders. The design of the boat offered, should be guaranteed to be free of avoidable pockets where water tends to accumulate during service, during rains etc.
3. The pedal boat should be fitted with wood backed fibre glass fender only. The fender should be of minimum 80 x 50mm dimension. The upper deck and hull should be finished with gel-coat. Special care must be taken to design the forward deck corners for impact resistance due to accidental knocks and the corners rounded. This is of utmost importance since the forward in all the supplied boats are always prone to early damage.
4. The pedal boat should be fitted with a manually operated plate rudder with smooth surface and it should have a smoothly rotating efficient pivot and lever with handle. The rudder should be tucked within the overall dimensions of the boat. Rudder stoppers must be provided to limit turning angle to +/- 30 degrees and in no case, the rudder plate should touch the hull in the extreme positions on both sides. Teflon bushes must be provided for the rudder shaft. The total pedal, transmission, paddle wheel assembly must be guaranteed for 3 years trouble free working with guarantee periodic maintenance as required by the manufacturer.
5. The pedaling mechanism must be designed to smooth, trouble free operation. Teflon bushes are highly recommended. The paddle vanes may be Aluminum or galvanized steel plating.
6. The name and emblem of Tamilnadu Tourism must be displayed with computerized lettering and approved size and design on both sides of the hull.
7. The design should ensure that the free board of the boat is kept at 0.3m minimum as above and the trim of the boat is also even. The boat should be floating with even trim with the full complement of passengers.
8. The bid offer should include guarantee maintenance and periodic service for 3 years from the date of commissioning.

TECHNICAL SPECIFICATION FOR 8 SEATER FRP MOTOR BOAT (WITHOUT OBM)

Description:

The 8 seater mono-hull motor boat is to have a speed of 11 knots powered with 9.9HP or 15 HP 4 stroke OBM. The hull form should be sleek, streamlined and elegant to optimize propulsive power so as to achieve maximum possible cruising speed with the 9.9 HP or 15 HP

Signature of the Bidder

OBM to be fitted. Where canopy design should be provided as a light fibre glass corrugated type roofing supported on epoxy coated/powder coated tubular steel frame support. The canopy design should be approved by the consultant and it is emphasized it should give sleek appearance with a degree of curving at the two sides to shelter the passengers from slanting rain, sun. Bidder should provide General Arrangement drawing to scale, showing the profile, plan and mid-ship section of the boat. Main structural members, shell thickness, deck and fender details, foam filling location with approximate quantity of foam in each region should be indicated in the bid submitted. The drawing should indicate the inclusion of all the specifications indicated below. Failure to include correct technical drawing and specifications indicated below. Failure to include correct technical drawing and specifications will lead to rejection of the bid. Any bid without drawings (not pictures) will be rejected.

1. The following are the approximate dimensions, a deficient maximum tolerance of 5% is permitted, however the total deficient tolerance cannot exceed 10%:

Length :5.5 m

Breadth : 1.75 m

Depth : 0.80m

2. It should have fiber glass bucket type seating for 8 passengers all facing the forward of the boat. The seat back rest should be rigid and not deflect in use. Seats not meeting these minimum standards will be rejected and will have to be replaced by the manufacturer. There should not be any visible raw finish of fibre glass. The seating should ensure comfortable, ergonomic seating, posture and space for tucking legs. The seat should reflect good ergonomics to be approved by the consultant.

3. The hull is to be reinforced with at least five layer of fiber glass consisting of a combination of chopped strand mat and woven roving impregnated with isophthalic resin. Single hull construction is accepted.

4. The boat will have inner paneling so that no rough fiber glass finish is visible from anywhere.

5. The boat will have an aesthetic, strong forward bow deck of approximately 1m length.

6. The inner bottom area is to be provided with wooden grating and any bilge water accumulating in the bottom should be capable of being bailed out by removing the wooden grating at the middle portion and being put back after water removal operation. Since the boat is of open construction, the timber should be of good quality. The timber should be painted. The bottom should in no case be permanently sealed and no bottom foam filling is allowed.

7. Adequate space should be provided between seats however unnecessary vacant spaces should be avoided by intelligent design with ergonomics to avoid crowding of passengers at side.

8. Polyurethane foam filling is to be provided by filling in distributed areas of hull. There shall be no foam filling at the bottom of the boat. The foam filling is to be provided in the forward bow region, the aft and transom region, the vertical spaces between inner paneling and outer hull on both sides of the boat, and to some extent, under the bucket seats, after providing comfortable leg tuck in spaces under seats. The seat must be a single piece integral with base, seat and back rest, with suitable foam filling in the base. The seat is to be efficiently bolted or secured to the hull. Seats must be durable considering the open weather condition in which the boat is operated. There should be no raw fiber glass surface anywhere. Seats must be guaranteed to last minimum 3 years during the maintenance period and should be serviced by the manufacturer as required. Ugly patchworks are not permitted.

Signature of the Bidder

9. The hull structure should be stiffened with a system of longitudinal and transverses consisting of hat section stiffeners of approximately 100 width and 75 height with 5 layers.
10. The boat should be designed to give maximum speed of 11 knots when operated with 25 HP OBM.
11. The fender should be internally timber reinforced and externally made integral with the hull in fiber glass with dimensions 100 width x 60 depth. Alternatively best quality marine rubber fender (Different types of equivalent) is to be provided with guaranteed life of not less than 3 years. In the event of deterioration the manufacture has to replace the rubber fender during the 3 years.
12. The boat should be fitted with one stainless steel bollard at the bow and one each on the starboard and port side in the aft.
13. The boat hull should be finished with thick polished layer of gel coat.
14. The name and emblem of Tamilnadu Tourism should be fixed with computerized stickers of approved size (by consultant) on the two sides with lettering height 100 with high quality adhesive bonded plastic film computerized process.
15. The bid offer should include service maintenance for 3 years after delivery.
